The Recovery Act: Creating Jobs and Making a Difference in Alabama

Earlier this year, the Democratic Congress worked with President Obama to enact the *American Recovery and Reinvestment Act* (the *Recovery Act*) in an effort to rescue, rebuild, and strengthen our struggling national economy. Eight years of failed fiscal policies and misguided economic priorities had left our national economy on the brink of disaster, and now – only nine months later – our economy is on the brink of recovery. The *Recovery Act* and the efforts of American businesses and workers, like those in Alabama, made this progress possible.

Despite this encouraging news, Democrats know that many Alabamians are still struggling, and unemployment – a lagging economic indicator – remains far too high. In response, Democrats are working to create and save millions of jobs with *Recovery Act* dollars and tax relief. Already, with more than half of the dollars yet to be spent, the recovery package has provided for more than one million jobs and the rate of job loss has slowed significantly. As we look toward the future, Democrats believe that the *Recovery Act*, combined with the American work ethic and ingenuity, will continue to make a difference for families in Alabama and will deliver on its promise to rebuild our economy and get Alabamians back to work.

The Recovery Act is Creating Jobs and Making a Difference

Last week, the White House announced that certain recipients of *Recovery Act* funds have reported the creation of 640,329 direct jobs. About 325,000 of these jobs are in education and over 80,000 are in construction. These numbers, however, represent only about 16 percent of expenditures through September 30 and do not reflect the majority of *Recovery Act* funding to date, which has gone directly to individuals and states, including:

- Tax relief for businesses and working families;
- Small business loans, which are exempt from reporting;
- The first-time homebuyer tax credit;
- Direct federal aid, including \$250 direct stimulus checks, enhanced unemployment benefits, increased food stamp benefits for vulnerable families; and
- State fiscal relief, which prevented job cuts at the state and local government level.

Moreover, the reported data does not capture indirect or induced jobs created when prime contractors hire suppliers or other companies to complete projects or when newly employed

workers spend their pay checks. It is estimated that, if included, indirect jobs would add another 50 percent or more to the direct jobs numbers and induced jobs would add an additional 36 percent. [Office of the Vice President, [10/30/09](#); CBPP, [10/28/09](#)]

Taken as a whole, the reported data confirms earlier estimates that the *Recovery Act* would create or save over one million jobs by now, even though less than half of the *Recovery Act* funds have been put to work. [Office of the Vice President, [10/30/09](#)] According to Congressional Budget Office (CBO) projections, that number may be as high as 1.6 million jobs. [CBO, [11/09](#)]

Moreover, without the *Recovery Act*, economists believe that the economy and the unemployment rate would be much worse.

- According to CBO projections, “an additional 600,000 to 1.6 million people were employed in the United States, and real (inflation-adjusted) gross domestic product (GDP) was 1.2 percent to 3.2 percent higher, than would have been the case in the absence of ARRA.” [CBO, [11/09](#)]
- The Commerce Department reported that the nation’s gross domestic product grew by 2.2 percent in the third quarter of 2009, the first expansion in more than a year. Economists are projecting 4 percent growth in the fourth quarter. [Commerce Department, [12/22/09](#); testimony of Dr. Martin Baily before the Senate Democratic Policy Committee, [12/16/09](#)].
- According to economist Mark Zandi, “The research of Moody’s Economy.com suggests that a million fewer jobs would exist today, while the unemployment rate would already have risen well into double digits.” [Testimony before the Joint Economic Committee, [10/29/09](#)]

The Recovery Act is Creating Jobs and Making a Difference in Alabama

In Alabama, this partial reporting indicates that 4,884 jobs have been created or saved by funding 1,012 awards worth \$2,492,509,402, of which \$545,184,755 has already been received. [Recovery, Accountability, and Transparency Board, accessed [11/2/09](#)]

Similar to the national number, this validates the White House’s earlier estimates that the *Recovery Act* is responsible for saving or creating 13,500 jobs so far for Alabamians (accounting for indirect and induced jobs). [Council of Economic Advisors, [9/2009](#)] **Alabama is on track to benefit from a total of 52,000 Recovery Act jobs.** [The White House, [2/2009](#)]

These numbers alone cannot adequately convey the human impact of the jobs that are supported by the *Recovery Act* – the real-life stories of local companies that can hire new employees, workers who are no longer faced with uncertainty, and families that no longer need to struggle to pay their bills. The following is a sampling of some of the local *Recovery Act* success stories in Alabama:

Recovery Act grant will help a Montgomery-based facility provide health care to nearly 25,000 uninsured and underinsured people in the area. “An \$11.2 million federal stimulus grant will help about 25,000 uninsured and underinsured people in the area receive health care. The funds will enable Health Services Inc., a Montgomery indigent health care provider, to replace a 42-year-old clinic with a larger facility so that it can offer primary care to 25,000 additional people currently going without it. HSI, a private nonprofit that

operates 10 federally qualified health centers in the River Region, was notified Wednesday that it is one of 85 providers in the country being awarded a piece of \$600 million in funds available through American Recovery and Reinvestment Act grants. HSI's award, which was the only grant of its kind awarded in Alabama, will serve the uninsured and underinsured in the area and ease the strain on local emergency rooms.... An obvious need was replacing the Lister Hill clinic, which was built in 1967. So when the federal government announced it would be awarding federal stimulus grants for major construction and renovation projects and to help health centers adopt more modern information technology systems, the River Region was ready.” [Montgomery Advertiser, 12/9/09]

Recovery Act grant will help Montgomery Public Schools install energy-efficient, double-paned windows to make winters warmer and summers cooler for students.

“On Monday, state Rep. Greg Wren presented Montgomery Public Schools officials with a \$431,600 energy grant to replace 218 windows at the high school with energy-efficient, double-paned windows that are sure to make winters warmer and summers cooler for students, school officials said. LAMP also will be getting new energy-efficient window air-conditioning units using the grant, which is being administered by the Alabama Department of Economic and Community Affairs, Wren said... The funds Gov. Bob Riley awarded to LAMP were part of \$5 million made available to Alabama schools from the U.S. Department of Energy as part of the American Recovery and Reinvestment Act of 2009, Wren said...’ For years kids have been suffering in classrooms,’ Davis said of LAMP. ‘The new energy-efficient windows will make it a much more comfortable place for students to learn in.’ [Montgomery Advertiser, 12/1/09]

Recovery Act grant will help up to 40 automobile suppliers in Alabama reduce energy costs and retain employees.

“Gov. Bob Riley announced Wednesday a federal stimulus grant award of \$600,000 to help automobile suppliers in the state reduce energy costs and retain employees. The University of Alabama in Huntsville was granted the money to help up to 40 suppliers increase energy efficiency and reduce waste in the manufacturing process, said a news release. ‘Automotive manufacturing has become a vital component of Alabama’s diverse economy,’ Riley said. ‘Helping these manufacturers reduce waste and cut energy costs will boost their competitiveness and provide increased job security for many Alabamians.’” [Birmingham Business Journal, 11/25/09]

Birmingham, Alabama uses Recovery Act funds to improve its transit system. “An Anniston company says the Birmingham's transit system is buying 12 new buses from the company at a cost of \$5 million, using federal stimulus funds. The Anniston Star reports that North American Bus Industries says the project is one of many under the stimulus program that is helping the company stay busy... Birmingham's transit agency was awarded a stimulus grant of \$8.7 million to purchase new buses, rehabilitate a maintenance garage and to buy equipment to clean and repair buses. Gibson says the buses being sold to Birmingham will run on compressed natural gas.” [WHNT, 11/25/09]

Recovery Act money helps homeless in Huntsville. “For the homeless and those on the verge of becoming homeless, nearly \$530,000 in federal stimulus money is now available. The City of Huntsville learned in April it would get the money to help the needy, and in August, it notified five local agencies that federal Homelessness Prevention and Rapid Re-Housing money would be funneled through them. On Tuesday it was announced the money is now in hand, and applicants can register for help... Nationally, \$1.5 billion has been set aside for the Homelessness Prevention and Rapid Re-Housing Program, which is overseen by the Department of Housing and Urban Development. Across Alabama, \$13.3 million has been divvied up.” [Huntsville Times, 11/25/09]

70 Alabama schools will receive *Recovery Act* grants for energy improvements.

“Gov. Bob Riley’s press office announced Tuesday stimulus grants for 70 Alabama schools for improvements that will save energy and reduce utility bills. The awards include a \$431,600 grant for the Montgomery County Board of Education to replace 218 windows at Loveless Academic Magnet Program High School with new models that hold in more warm air in the winter and cool air in the summer. In addition to wasting energy, cracks in current window casings have resulted in moisture damage in classrooms. The grants totaling \$4 million will fund upgrades at schools in 14 systems in Alabama.” [*Montgomery Advertiser*, 11/24/09]

University of Alabama created or retained 51 jobs thanks to *Recovery Act*-funded research and other projects on campus.

“The University of Alabama has been allotted just more than \$32 million in federal stimulus money so far... About \$6 million came to UA through competitive federal grants, most for research... UA’s stimulus money has created or retained seven jobs... UAB reports 51 jobs.” [*Tuscaloosa News*, 11/22/09]

Auburn University used *Recovery Act*-funded grant for construction of research facility; projects including construction have enabled Auburn to create or retain 426 jobs.

“Auburn University... has been awarded more than \$66 million, with \$51 million in grants pending. The total awarded includes \$46.5 million in fiscal stabilization money for Auburn’s main campus, Auburn University-Montgomery and the Alabama Cooperative System. Auburn’s roughly \$20 million total in competitive grants also includes a \$14.4 million grant through the U.S. Department of Commerce to help pay for the construction of a research facility... That construction grant makes Auburn the leader for state universities in jobs created or retained from stimulus money through the end of October with 426 jobs, according to the university.” [*Tuscaloosa News*, 11/22/09]

***Recovery Act* funds will expand production at Coosa River Hydroelectric Plants.**

“Under the umbrella of the Department of Energy’s renewable energy funding, U.S. Energy Secretary Steven Chu announced last week that up to \$30.6 million in stimulus funds would go into modernizing seven hydropower projects. While \$30.6 million doesn’t sound like much in the context of the \$2.2 billion in renewable energy grants in all that were announced, the DOE estimates that the dam upgrades could increase generation by 187,000 megawatt-hours per year at an average cost of less than 4 cents per kWh — all without building new dams. In addition to benefiting a handful of cities and utilities, the funding is a boon to companies with technologies, such as high-efficiency fish-friendly turbines and advanced control systems... The funded projects are divided into two groups: those with more than 50 MW of capacity and those with less. The former group includes up to \$6 million for Alabama Power Company, which will replace vintage turbines at three hydroelectric plants on the Coosa River... In the best-case scenario, the *Recovery Act* funding of hydropower modernization projects will help stimulate other similar modernization projects, and dams that are simply obsolete and really do live up to the bad dam stereotype will eventually be removed.” [*Solve Climate*, 11/12/09]

Drug Task Force in Alabama will use *Recovery Act* funds to pay overtime and buy new vehicles.

“The Baldwin County Drug Task Force will receive \$465,705 in economic stimulus funds, according to the governor’s office. The grant money will be used to help the unit investigate, arrest and prosecute drug offenders. The Baldwin County Drug Task Force is a specialized law enforcement unit composed of representatives from the district attorney’s office, the sheriff’s office and the police departments of Bay Minette, Daphne and Orange Beach. Sheriff Huey ‘Hoss’ Mack Jr. said funds would largely be used for buying vehicles, equipment to improve technology and other electronics, though the money could go toward other uses too. ... Gov. Bob Riley awarded a total of \$940,705 in stimulus funds to south Alabama. The Mobile

County Street Enforcement Narcotics Team was also awarded a \$475,000 grant. ‘As coastal counties, Mobile and Baldwin are vulnerable to illegal drugs transported over water routes as well as by air and land routes, including the two interstate highways that serve the area,’ Riley said in a written statement.” [*Press Register*, 11/8/09]

A \$6 million Recovery Act allocation will help Alabama Power Co. upgrade electrical generating units at three dams. “The U.S. Department of Energy is allocating up to \$6 million of federal stimulus money to help Alabama Power Co. upgrade electrical generating units at three dams on the Coosa River. Alabama Power spokesman Michael Sznajderman says the \$6 million will help with a \$30 million project to upgrade two generating units at Lay Dam, one at Bouldin Dam and one at Jordan Dam. The Department of Energy said replacing equipment that is 40 or more years old should increase the electrical generation at the dams by more than 7 percent.” [*Associated Press*, 11/6/09]

Alabama will use Recovery Act grant to set up broadband. “Alabama is slated to receive \$1.9 million in federal stimulus grants for broadband Internet mapping and planning activities in the state. The NTIA [National Telecommunications and Information Administration] said Alabama’s funds were awarded to the Alabama Department of Economic and Community Affairs. Approximately \$1.4 million will go toward broadband data collection and mapping activities over a two-year period, said a news release, and about \$463,000 will go toward broadband planning activities over the same time period.” [*Birmingham Business Journal*, 11/6/09]

The University of Alabama has created seven new research positions with a \$32.1 million Recovery Act grant. “The University has been awarded \$32.1 million dollars in American Recovery and Reinvestment Act funding, as well as the state’s allocation in its fiscal stabilization fund. The money will be used in research projects, infrastructure improvements and job creation and retention. ... The University of Alabama at Birmingham received millions from the National Institute of Health because UAB is known for its research in medicine, Benson said... According to OMB employees, the University created seven new jobs by the beginning of October and expects to continue to apply for additional funding.” [*The Crimson White*, 11/2/09]

The Recovery Act has created or retained more than 4,500 jobs in Alabama. “[M]ore than \$1 billion in federal stimulus money has been made available so far to state agencies and colleges... Alabama has met the federal government’s first deadline to report use of stimulus funds. And that report... shows \$1 billion in available stimulus money has created or retained more than 4,500 jobs in the state, with about \$531 million expended as of Sept. 30. This is the first of the quarterly reports that Congress is requiring from states to show how the allotted stimulus money is being spent. The state of Alabama is slated to receive about \$3 billion.” [*Birmingham Business Journal*, 10/14/09]

Alabama will use new Recovery Act funding to make prisons and schools more energy efficient and provide an energy revolving loan fund to create and retain jobs. “Alabama has received an additional \$27 million in federal stimulus funds for energy programs. [Secretary of Energy Steven] Chu said Alabama will use part of the funds to create an energy revolving loan fund to stimulate the creation and retention of jobs. Some will be used to make prisons and schools more energy efficient. Money will also be used to help auto suppliers improve their energy efficiency.” [*Montgomery Adviser*, 10/8/09]

Complaints against Alabama DOT were inaccurate: Recovery Act-funded contract awarded to GA company has resulted in subcontracts to Alabama firms. “Alabama’s Department of Transportation was criticized in June when it awarded the state’s largest

stimulus-funded highway project - rebuilding 11 miles of Interstate 59 in Etowah County - to an out-of-state business. But records show that most of the subcontractors and material suppliers hired by Kentucky-based Hinkle Contracting for the \$37.4 million project are Alabama firms. State companies make up five of the nine subcontractors hired to work on the project, which gets under way Sept. 8 with widening the road's shoulders. And five of the six major materials suppliers are from Alabama.” [*Birmingham News*, 8/29/09]

Alabama Symphony Orchestra received a *Recovery Act*-funded grant from the NEA, allowing educational programs to continue. “The Alabama Symphony Orchestra will receive a \$50,000 grant through the American Recovery and Reinvestment Act funds. The ASO is one of three arts organizations in Birmingham and 631 in the nation to receive the highly competitive grant administered through the National Endowment for the Arts... One-time grants were awarded from those funds to eligible nonprofit organizations for projects that focus on the preservation of jobs in the arts. The ASO grant will support its director of artistic administration, education manager and Bruno Walter Assistant Conductor Chair positions, all essential to delivering ASO's education programs. ‘At a time when budget pressures are causing many orchestras to cut back on education programs, this award makes it much easier for the ASO to continue our strong commitment to education,’ says Curt Long, executive director of the Alabama Symphony.” [*Mobile Press-Register*, 8/6/09]

The Chana High School special education program used *Recovery Act* funds to hire students to refurbish a garden. “Over the past couple of months, several Chana High School students were given an outdoor alternative to the typical summer job. Chana was awarded a \$21,500 grant as part of the American Recovery and Reinvestment Act, which the school’s special education program used to refurbish a garden, and to hire students to do it. Sharon Williams of the Golden Sierra Job Training Agency was the liaison between the grant and the Placer Union High School District. She explained that in order to qualify for employment paid by the grant, students had to have a low-income, disability, or other circumstances that might make it difficult for them to find a job. The students were paid minimum wage and supervised by Chana High teachers in rebuilding a greenhouse, re-fencing the garden, and clearing a trail to a picnic area and volleyball court.” [*Auburn Journal*, 8/3/09]

Cedar Bluff town council voted to apply for *Recovery Act*-funded grant to hire contractors for much-needed street paving. “during this week’s meeting of the Cedar Bluff Town Council, a lengthy discussion took place, on the passing of a resolution making an application to the Alabama Department of Economic & Community Affairs for Community Block Grant Funding – with the funding being used to help pave Sewell Ferry Road, Hidden Cove Road, Cornwell Drive, Forrest Street, Cathy Street, Summer Place, Lake Place Road, Lake Place Street, and Lake Place Lane. The monies for the project would come from stimulus funds, made available through the Community Block Grant.” [*WEIS News Radio*, 6/11/09]

Tuscaloosa, Marion, and Aliceville Airports will hire contractors to improve runways with \$12.2 million in federal economic *Recovery Act* money. Using the *Recovery Act* money for airport projects will keep smaller construction contractors in business and their workers employed. Some might go out of business without the work, leaving less competition in the future. [*Tuscaloosa News*, 6/9/09]

Bus industry forecasts stabilizing thanks to *Recovery Act*-related orders; bus industry retaining jobs. VP of North American Bus Industries of Anniston: “It helps preserve the jobs that we have. We don't have plans for any massive hiring. Right now we're just trying to maintain stability.” [*Fox Channel 5 News*, 6/7/09]

Recovery Act funds will provide jobs for 341 young people in four Alabama counties. “The jobs pay \$7.25 an hour for a maximum of 35 hours a week. Workers can get in 210 hours during the six-week program. If Macon County fills its 89 slots, \$21,738.25 will be paid to those who qualify and work the maximum hours. Designed to provide a meaningful work experience, the program calls for jobs to be distributed among the four municipalities in Macon County--Tuskegee, Shorter, Notasulga and Franklin.” [[The Tuskegee News](#), 5/21/09]

The Recovery Act will supplement budget, Alabama will avoid laying off teachers, keep reading program. “Without federal stimulus money, the \$6.2 billion budget would have been markedly smaller than this year's budget. But it should prevent teacher layoffs, which is one of two critical reasons this flawed-but-necessary budget should be cheered rather than jeered.” [[Anniston Star](#), 5/9/09]
